

Front-End Challenge:

Create a “View my Contacts” Webapp:

You are required to write a ‘View my Contacts’ Web App which will read the data from the provided “*contacts.json*” file and display it on the front end.

The implementation will have the following layout:

Contacts	
Bob George 0123456789	Bob George
Alice Burger 0987654321	
Trudy Turner 0654987321	Cellphone: 0123456789
Pieter Scott 0129874563	Email: bob@email.com
	Address: 512 Town Way

You are welcome to change the styling of the web app, as long as the layout remains as illustrated.

The web app should meet the following criteria:

- The web app should get the list of contacts from the provided “*contacts.json*” file
- The web app should display the retrieved contacts in the left column, as shown in the provided wireframe.
- The web app should render the selected contact’s details to the right of the contact list
